

MOHSEN SALARI

Senior Backend Engineer

mohsensalare@gmail.com | linkedin.com/in/mohsensalare | github.com/mohsensalare

Open to relocation in EU | 1999 (27 years)

Professional Summary

Senior backend engineer with **6+ years'** experience in building and scaling **high-traffic production Python** systems across domains including real estate, e-commerce, and AI services. **Own systems end to end**, design, implementation, deployment, and monitoring. **Set technical direction** for a **team of 8 develops**, turn business goals into scope the team can ship, and bring several new engineers up to independent Django developers.

Skills

Backend: Python, Django, Django REST Framework, FastAPI, Celery, **PostgreSQL**, Redis, Kafka, RabbitMQ, WebSocket/SSE, Query optimization, Caching, Test unit

DevOps & Reliability: AWS (EC2, RDS, S3, SES), **Docker**, Nginx, Linux, CI/CD, Prometheus, Grafana, Sentry, Loki, Locust, WAF, rate limiting

Leadership: Technical direction, mentoring, code review, cross-functional collaboration, independent ownership

Professional Experience

Kotook | Real estate platform kotook.ae

Dubai, United Arab Emirates

Senior Backend Engineer & Technical Lead

Apr 2024 - Present

- **Architecture & Ownership:** Own the architecture and **end-to-end delivery** of a real estate platform and internal CRM on **AWS**, from requirements through production.
- **Team Leadership:** Set technical direction for an **8-developer team**, split product goals into parallel workstreams, run code review sessions, introduce new AI coding tools to the team, and help new hires deliver independently.
- **Performance:** Cut **backend p95 by 61%**, **p99 by 66%**, and **homepage API p95 by 95%** while absorbing **nearly 2.6x traffic on the same infrastructure**, by enhance queries, caching layers, and CDN image delivery.
- **AI Services:** Built AI services for users and admins, including an in-page chatbot, agentic property comparison, personalized recommendations, and automated project-data validation and autocomplete using web sources and product documentation, reducing reported data-entry errors by **15%** and increasing data-entry speed.
- **Mobile:** Shipped the **Android and iOS apps solo** with **AI coding tools**, on a shared **Kotlin Multiplatform** core with native SwiftUI and Android interfaces and an embedded page-aware AI assistant.

ZoomaOutlet | Multi-branch online retail zoomaoutlet.com

Senior Backend Engineer

Sep 2025 – July 2026

- **Platform Rebuild:** Replaced the legacy WordPress store with a modern **Django REST and Next.js** platform, improving speed and stability while remaining reliable through an **18x traffic spike** during recent campaigns.
- **commerce:** Built core commerce workflows, including multi-branch inventory, advanced promotions, the full order-to-delivery cycle, returns and after-sales service, and point-of-sale systems for physical branches.
- **Scale and Reliability:** Supported tens of thousands of products and thousands of monthly orders, with a **p95 response time of 310 ms**, **p99 of 560 ms**, and a **0.005% 5xx error rate across more than 18 million server requests**.
- **Growth & Conversion:** Increased Google organic clicks by **43%** and returning users by **18%**, while reducing abandoned carts by **13%**.

Faza Zaman Hormozgan | Public sector startup

Backend Engineer & IT Manager

Jun 2020 - Apr 2024

- **Scope:** Delivered **several production systems in four years**, owning data modeling, API design, deployment, and production support on each.
- **Public Transit & Payments:** Proposed and delivered **Android POS devices** as one integrated solution for bus management and citizen-card payments, replacing separate GPS and card-reader hardware and cutting deployment and maintenance costs.
- **Public Services:** Built backend services for **municipal levy calculation and payment**, source-separated waste collection, and a tourism guide app.
- **RFID Asset Tracking:** Designed the backend for a **UHF RFID indoor tracking system** that ingests gate reads and updates item locations, showcased at **GITEX Global** in Dubai.

Additional Skills

Applied AI: RAG, vector search, pgvector, model serving, OpenAI API, agentic workflows, AI-assisted development (**Claude Code, Codex, Cursor**)

Also: Next.js, React, technical SEO, cross-platform mobile delivery

Selected Projects

VectorLens: Distributed Semantic Search Backend | github.com/mohsensalare/VectorLens

- Built an open-source platform for data storage, **semantic text search, and image** similarity search using **FastAPI, PostgreSQL, and pgvector**, with Kafka/Celery for asynchronous processing, SSE progress updates, JWT/RBAC authentication, and multi-stage Docker builds.

DjangoProMetric: Observability for Django/DRF | github.com/mohsensalare/DjangoProMetric

- Built an **open-source, observability package** that automatically discovers Django and DRF endpoints and links traffic, performance, error, and database signals to each route in a protected operational dashboard.
- Designed a flexible provider system for **Cloudflare, Sentry, PostgreSQL, ArvanCloud, and custom sources**, with automated monitoring onboarding, historical comparisons, secure access, tests, CI, documentation, and packaged releases.

Irregular Verbs: Learning Product (PWA, Android, iOS) | irregularverbs.ir

- Built end to end with AI coding tools: a **244-verb PWA** with matching Android and iOS apps, 5 practice modes, offline support, push reminders, and Playwright end-to-end tests.

Education

Bachelor of Science, Computer Software Engineering | Fasa University | Jan 2018 - Apr 2023

Ranked 4th in the graduating class.

Relevant coursework: Operating Systems, Database Systems, Computer Architecture, Machine Learning, Computer Vision.

Award

Won 2nd place as part of a two-person team in the 2024 AI Star competition for developing a **predictive fault-detection** system for refinery cooling equipment, hosted by Persian Gulf Star Oil Company, operator of the Middle East's **largest gas condensate refinery**.
